

Conceptual Thinking

NO NEW THEORY

Presentations

Today's goal

What will you learn today?

- You discover other ways of thinking within Conceptual Thinking.
- You will learn to better justify and substantiate your own work.
- You sharpen your own portfolio through criticism and reflection.
- You will learn to give and receive constructive feedback.

What are you bringing?

- Your physical portfolio from previous weeks (all diagrams, charts, insights)
- Possibly notes from the case discussion.

Presentations

Method

1. You will be assigned to a new group of 4 students.
2. Each student presents his/her case and portfolio briefly and concisely (max. 10 min).
3. The rest of the group asks questions, challenges and suggests improvements (10 min).
4. This is how it goes for every student in the group.
5. Record insights, ideas, and inspiration during conversations.

Time division

Activity

Case discussions in groups

Individual reflection preparation

Presentations (individual)

Comments

4 students x 20 min (10 min explanation + 10 min feedback)

What did you learn? What would you change? What were your strengths?

5 minutes per student

Presentations

What is expected of you?

- You present your case clearly to your group members
- You ask critical questions of others
- You are open to feedback
- You take notes for your reflection

Your individual presentation (end of class)

Key questions:

1. What did you learn from the other cases?
2. What would you change about your portfolio now?
3. What do you think is strong about your portfolio?

Tip: Focus on insights, not perfection. Show that you're growing as a conceptual thinker.

Presentations

What's the goal?

- You discover other thinking strategies
- You learn to make better decisions within concept development
- You develop critical reflection skills
- You will learn how to substantiate and defend your ideas more strongly.
- Your portfolio will become richer and stronger in content (Important for P2 and your EXAM)

Final tips

- Be curious, not defensive
- Be concise and substantive
- Use feedback to strengthen your own work
- Note down specific points for improvement
